Hand Winch

Application:

The stuff winch is a small, handy unit for winding and storing of polyester line for small plankton nets, water samplers, etc.

Item	Preparation	
1	<p>The hand winch consists of 2 stainless steel rings with strong Beaver nylon; it comes as a collapsed unit.</p> <p>Model 17.200 is designed for approx. 50 m of Ø5 mm polyester line, while model 17.201 supports up to 100 m approx.</p>	
2	Unfold the hand winch	
3	Make a loose coil and a knot, so the line is secured to the stuff winch.	

4

Now you can wind the line onto the stuff winch

Storing and Maintenance

The winch and the line can be washed with fresh water and a mild soap. Before storing, allow the items to dry.
